

THE GOVERNMENT OF THE PHILIPPINE ISLANDS
DEPARTMENT OF AGRICULTURE AND NATURAL RESOURCES
WEATHER BUREAU

STATION AT

Jolo, Sulu

May 11, 1929

The Director of the Weather Bureau
Manila
Rev. Father,

The Eclipse of the sun last May 9, 1929, was hardly noticeable in Jolo, Sulu. The day was so cloudy that the sun did not shine brightly. So that the Eclipse lessen the light of the day but very little to be noticeable.

The only thing I noticed at 3 p.m. when I looked up the sun, the edges of the sun and moon were in contact already. Little by little the moon covered $\frac{1}{5}$ of the sun at 3:25 p.m. During such course, sparkling of weak light was seen at the face of the sun. Lines of bright cloud were visible around the sun. May be there were light coming from the side of the sun. Above the sun there was dark cloud. Little darkness was felt only
