LA CARLOTA, NEGROS OCC. November 4, 1933

Rev. Father Miguel Selga  
Director, Weather Bureau  
Manila, P. I.

Dear Father Selga:

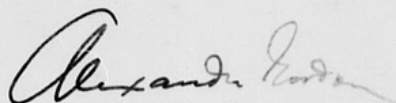

Of course you have known already of the storm that scared us here yesterday. However, it is really not so bad as far as damage is concerned around the Central, but it gave us the scare for almost 12 hours. The barometer registered only up to 744.5 mm. In this connection, would it be possible to obtain a map of the Philippine Islands showing the paths of known storms? I would be very much obliged if you can furnish me one, also your bulletin on Climate of the Philippines. If these are not available free, please bill me the cost.

By way of passing, I would like to inform you that Mt. Canlaon, is still giving up smoke every once in a while. I suppose this will continue for sometime yet.

I want to announce to you that Mrs. Gordon has delivered a baby boy at the Philippine General Hospital on October 17 last. We are going to name him after his grandfather. They are still with her folks in Padre Faura.

Anticipating your kindness in granting my above request, I beg to remain,

Yours very truly,

  
ALEXANDER GORDON
