411 LEVERIZA, MALATE
MANILA, PHILIPPINE ISLANDS

24 April 1933

Rev. Miguel Selga, S.J., Director
Weather Bureau
Manila

Dear Father Selga:-

Please do not think that I have purposely ignored your kind letter of 20 February, 1933, concerning data and photographs pertaining to my 1902 ascension of Canlaon Volcano.

The truth of the matter is that for many months I have been too ill to attend to even my routine correspondence.

Somewhere among my negatives I have some of which are still in fair condition and as soon as I get well I shall seek them out and let you know what they are or let you have them for getting copies. There is also a very fair copy of a map which I have kept all these years. It is at the north of the old crater, by which we were named for my wife, Ella Nora Banks. Thank you for the rainfall chart you so kindly sent me.

When I feel better I shall come over to see you.

Yours sincerely,

Charles S. Banks
