

LUCBAN INSTITUTE
INTERMEDIATE AND FIRST, SECOND AND THIRD YEAR
HIGH SCHOOL
APPROVED BY THE GOVERNMENT

LUCBAN, TAYABAS.

Nov. 18, 1928.

**The Director
Weather Bureau
Manila, P.I.**

Dear Sir:

Relative to your request to find reliable informations from the old people who now live in Lucban as to whether they had seen any "big ball of fire" on the typhoon which had swept Mauban sometimes on the year 1890, I-extremely regret to inform you that after interviewing several old people they could not give me the information requested. Some of them told that they do not remember of any severe typhoon which had passed in Lucban at that time. An old man had informed me however that on the typhoon which had passed in Lucban in 1870 which he considers to be the strongest and most severe typhoon which had ever visited Tayabas he saw some balls of fire in the sky during the said typhoon.

Hoping that I may again be of service to you on other occasions, I remain,

Very respectfully,

Juan V. Eleazar
Director
