

THE GOVERNMENT OF THE PHILIPPINE ISLANDS
DEPARTMENT OF AGRICULTURE AND NATURAL RESOURCES

WEATHER BUREAU

STATION AT Pontevedra, Occ. Negros

May 10, 1929.

The Director of Weather Bureau,
Manila, P. I.

Sir:

Inclosed please find under cloudy observation of the sun eclips with accompanying drawing my eye witnessed observation from this station. The sun has been hidden by the clouds from 2:10 P.M. that an occasional appearance of the sun from the passing clouds would give us a hint, and a faded view as far as my witness, the sight. I wish I could give you the drawing of total eclips, but since it is totally hidden by the clouds, I could ascertain its full view, but I have observed that the light of the day is beginning to dusk till it was as dark as 7:00 P.M. because passing automobiles put on their lights within the total eclips.

Very respectfully,

SALVADOR TAVARRO.
Observer.
