

392 Sanciango St.
Cebu, May 11, 1929.

The Director
Weather Bureau.

Sir:

I have the honor to submit my drawing during my observations of the recent total eclipse of the sun on May 9, 1929.

The table attached show the times to the corresponding lines shown on the drawing I and II respectively. Drawing I is from the first contact to beginning of totality. Drawing II is after totality to the end.

The two long rays at the bottom (West) were the brightest.

Place of observation --- In the city of Cebu, Cebu, near the train station facing West.

Error of our Watch --- Late time.

Sincerely yours,

Ramon R. Trinidad
(Timer)

Jose S. Alessio
(Drawer)

Jamie B. Bland
(Other Observer)
