

February 15, 1941

Mr. Julio Ducusin
Davao City

S i r :

The salary is sent to you via airmail as you requested.

It is also noted that you and many other people have observed a comet in the evening. The comet observed by you on February 3rd and subsequent nights was not the comet of Cunningham but another comet seen in South Africa by Mr. Paraskevopoulos and in New Zealand by Mr. McIntosh. It is getting now fainter and fainter and very soon will cease to be visible to the naked eye. Only superstitious people will seriously believe any connection between human activities and the comet.

Very respectfully,

MIGUEL SELGA
Director, Weather Bureau
