

Re New Volcano,
Central Mindanao.

December 23, 1916.

Gen. Herman Hall,
Chief of Constabulary,
Manila.

S i r:

I received the copy of the report of Captain
Port on the newly discovered Ragang Volcano you
sent me: it is exceedingly interesting and I thank
you for your attention.

It seems now plain that the old Macaturing
Volcano is but the southern part of a volcanic
chain or system very active in past epochs and
covering nearly the whole Lanao District.

Very respectfully,

Director, Weather Bureau.
