

(1)

PHILOSOPHIC ASPECTS OF MODERN PHYSICS.

I N D E X

I. SPECIAL THEORY OF RELATIVITY.

<u>Section</u>	<u>Page</u>
General Introduction to Theory of Relativity.....	A
Introduction to Special Theory of Relativity.....	1
1. Newton's Ideas on Absolute and Relative Time, Space and Motion.....	1
2. Newton's Laws of dynamics.....	2
3. Newtonian Relativity.....	2
4a. Early Experiments on Possible Aether Drag.....	3
4b. The Michelson-Morley Experiment.....	4
5. Einstein's Special or Restricted Theory of Relativity....	5
6. The so-called Lorentz Transformation.....	6
7. Newtonian Laws under Lorentz Transformation. Mass and Energy.....	7
8. The idea of Simultaneity.....	8
9. The four-Dimensional Space-Time Continuum of Minkowski...	9
<u>Critique of Experimental Evidence.</u>	
10. The Michelson-Morley Experiment.....	11
11. Fizeau's Experiment.....	12
12. Astronomical Aberration.....	12
13. Doppler Effect.....	13
14. Michelson-Gale Experiment.....	13
15. The Sagnac Experiment.....	13
16. The Esclangon Experiment.....	14
17. The Trouton and Noble Experiment.....	14
18. The Experiments of Kaufmann and Neumann, etc.....	14
19. The Constancy of the Velocity of Light.....	15
<u>Is the Einstein Theory Necessary?</u>	
20. The emission or Ballistic Theory.....	16
21. The FitzGerald-Lorentz Contraction.....	18
22. Stokes' Hypothesis of Aether Drag.....	18
<u>Critique of Philosophical Aspects.</u>	
23. Moving observers, Rods and Clocks.....	19
24. What does the Lorentz Transformation really give?	21
25. The Equivalence of Mass and Energy.....	23
26. Is the Concept of Simultaneity Meaningless?.....	25
27. Minkowski's Four-Dimensional World.....	27
28. Summary of Conclusions concerning Special Relativity.....	31
REFERENCES.....	33

II. GENERAL THEORY OF RELATIVITY.

<u>Section</u>	<u>Page</u>
29. The Principle of covariance and choice of a Metric.....	36
30. The principle of Equivalence of inertia and Gravitation.	38
31. The geodesic Law of motion.....	40
