The Panay & Negros Telephone and Telegraph Co.
Ileile, Ileile

Dear Mr. Stevenet:

The plans of the eclipse expedition begin to materialize. The American Astronomers are going down to Ileile on their own mine-sweeper to start operations. I took the liberty of mentioning your name as one of the leading citizens and keenly interested in the success of the eclipse observation.

Our own party will come down to Ileile later in April.

Sincerely yours,

MIGUEL SELGA
Director, Weather Bureau.
