

Eclipse observation on May 9, 1929
Hinatuan, Surigao, Mind. P. I.
This observation is made at place
127 miles from the capital -
by Floride Castro.

To the Director of the Bureau of Weather
Manila, Phil. Islands

Sir,
I sent this data to you, though not so
as you have there but at least you can get
an idea of what I have seen at this remote
place about 127 miles from the capital, Surigao.

The apparatus that I used were, a piece
of a ground glass, two time pieces, and a com-
pass.

Hoping that this data will be of a help
to you, I am,

Yours truly,
Flor. de Castro
