

August 1, 1927.

The Superintendent,
Telegraph Division,
Bureau of Posts, Manila.

Dear Mr. Padua:

I am studying the effect of lightning in the Philippines. As the lightning frequently strikes tall isolated objects, may I ask you what is the experience of your division, as to the frequency of telegraph posts struck by lightning or damaged, and how often, if ever, are the masts of your wireless stations struck by lightning.

Thanking you for any information you may be able to furnish, I remain

Sincerely yours,

MIGUEL SELGA
Director, Weather Bureau.
