The Director
Weather Bureau
Manila

Sir:

I have the honor to submit to you seven different poses of the sun as it appeared on a smoky piece of glass this afternoon during the eclipse. I am regretting the fact that I forgot to record the time of each of the seven poses, but I hope that what I have done will be of service to you and to the bureau in general.

My service concerning the matter is open to you at your disposal. I am willing to clarify the figures in case you are confused of them.

Respectfully yours,

W. B. Mulligan
