

THE MUNICIPAL GOVERNMENT OF TANAY

RIZAL, P. I.

Office of the President

October 4, 1927.

The Director  
Weather Bureau  
Manila, P.I.

Rev. Sir:-

In reply to your communication of the 3rd instant, I have the honor to state that probably the news in question referred to the typhoon which passed here on the night of September 17, 1927. It was not severe and caused slight damage. No houses nor fruit trees are known to have been destroyed. It was so slight that we did not pay much attention. The damages were done by the extraordinary flood of the Tanay River inundating the newly planted tomatoes and other crops, along the river and the lowest portion of the poblacion damaging some personal property. The irrigation dams and canals were also partly damaged. The heavy rains probably fell near the source of the river, as it was not heavy in the town. Similar flood is said to have occurred decades of years ago.

Yours sincerely,

  
SIMON BENDANA,  
Municipal President.
