The whirlwind of Tuguegarao, on April 22, 1928 - A whirlwind originated clos ginated close to the Cagayan River, to the SW of Cataganian, moved to the NE or ENE, passed over the barrio of Paullua and ended ENE of Tuguegarao, close to the Libag barrio. Because of the force of the wind, which reached force 5 to 8, damage was done to the banana plantations, five houses were destroyed, acacia trees were pulled down and a dapdap tree was uprooted. The storm was attended by rain and hail.
